**The SADC Region registered annual inflation rate of 6.9% in May 2014 compared to May 2013 as measured by the HCPI. Month on Month inflation rate remained unchanged in May 2014 compared to April 2014.**

### Introduction

This is the thirty-third issue in series since the launch of news releases on SADC HCPI initiative. It provides updates up to May 2014 on HCPI for SADC Member States

### Annual Inflation rates for SADC Member States

The reported annual inflation rates for May 2014 for Member States range from a highest at 23.6% for Malawi and negative inflation at -0.1% for Zimbabwe. As in previous months, Malawi continued to record the highest, double digit inflation rate among the SADC Member States. The annual inflation rates for the rest of the other Member States were reported as follows: Angola (6.6%), Botswana (5.1%), Democratic republic of Congo (1.7%), Lesotho (5.1%), Madagascar (7.7%), Mauritius (3.1%), Mozambique (3.1%), Namibia (6.9%), Seychelles (1.7%), South Africa (7.4%), Swaziland (5.5%),

Tanzania (6.5%) and Zambia (9.4%), as reflected in table 2 below.

Compared to the SADC regional annual average inflation rate of 6.9% for May 2014, ten SADC Member States recorded annual rates below the regional average whilst five Member States namely: Madagascar, Malawi, Namibia, South Africa and Zambia registered rates higher than the regional average. See figure 3 below for more details.

### Month on Month Inflation rates for SADC Member States

Five SADC Member States registered decreases in the month on month inflation rates in May 2014, Malawi recording the major decrease (-3.7%) followed by Mauritius (-1.8%). The highest month on month inflation rate of 0.9% was registered by Lesotho as reflected in table 1 below.

### Annual Inflation Rates by COICOP divisions

With regard to the Classification of Individual Consumption by Purpose (COICOP) major divisions, five Divisions registered annual inflation more than the regional average of 6.9% in May 2014 compared to May 2013. These include Housing, Water, Electricity, Gas and Other Fuels (7.0%), Restaurant and Hotels (7.1%), Transport (7.8%), Education (8.1%) and Food and Non-alcoholic Beverages (8.4%). The remaining Divisions recorded annual rates of inflation below the SADC average of 6.9%. See table 4 below.

### Month on Month Inflation Rates by COICOP divisions

All the Divisions recorded increases in month on month inflation in May 2014 with the exception of Communication (-0.1%), Furnish, household equip & routine maintenance (-0.1%) and Housing, Water, Electricity, Gas and Other Fuels (-0.2%). Table 3 below provides details.

## Measures of inflation

The annual rate measures the price change between the current month and the corresponding month of the previous year. The rate is responsive to recent changes in price levels but it can

also be influenced by one-off effects in either month.

The 12 month average compares the average HCPI in the latest 12 months to the average of the previous 12 months. It overcomes

the volatility of the annual measure. The monthly rate measures the price change between the two latest months. Although up to date, it can be affected by seasonal and other short-term effects

## The Harmonised Consumer Price Index

The Harmonised Consumer Price Index (HCPI) is defined as the Consumer Price Index (CPI) developed from comparable methodologies. That means CPIs which have been developed from the concepts, definitions and methods that are comparable. CPIs are economic indicators that measure changes overtime of prices of consumer goods and services purchased by households. HCPI is meant to provide an official measure of inflation in the region, and it makes international comparisons easier since the national HCPIs are produced using harmonised methodologies and as much is practicable using the same statistical classifications, standards and frameworks.

Both the HCPIs and national CPIs measure inflation faced by consumers, and use the same

data sources in most part. However, the two measure inflation with different aims and therefore, sometimes October use different concepts and methods. HCPI's main use is for monetary policy, and is used as one of the convergence criteria to assess compliance of Member States to economic unions and to monitor progress towards integration. Member states of economic unions are given target inflation levels to achieve, in specified period to be considered for some preferential treatments within the integration. And this requires a harmonised conceptual framework and comparable results. The national CPIs in addition to being the measure of inflation have many other purposes such as cost of living which October require different methodologies.

The Member States HCPIs are produced by respective Member

States using agreed harmonised methodologies. The SADC HCPI is compiled by the SADC Secretariat by aggregating the National HCPIs of the Member States. These are calculated as weighted averages of the national HCPIs, using as weights each country's total household consumption expenditure converted to a common currency using the purchasing power parities derived from the results of the 2005 (for HCPIs prior to January 2013) and 2009 (For HCPIs since January 2013) International Comparison Program as supplied by the African Development Bank and the World Bank.

More information on SADC HCPI methodology can be availed on demand.

## Acknowledgement

The SADC Secretariat duly acknowledges with thanks the continuous support and cooperation of the respective

National Statistics Offices of SADC Member States in providing monthly national HCPIs which form the basis for the aggregate

SADC HPCI. The collaboration with COMESA and African Development Bank in this exercise is equally acknowledged.

## Production team

This news release was produced under the auspices of the SADC Statistics Programme in the Directorate of Policy Planning Resource Mobilisation of the SADC Secretariat, Gaborone, Botswana.
