SHORT TERM CONSULTANCY FOR SYSTEMS ASSESSMENT AND SPECIFICATIONS OF THE ONLINE MODULE OF THE SADC PROJECT MANAGEMENT SYSTEM

SADC POLICY PLANNING & RESOURCE MOBILISATION DIRECTORATE
1. BACKGROUND

1.1. The SADC Secretariat

The Southern African Development Community (SADC) is a regional economic community of 16 Southern African States.

The main objectives of Southern African Development Community (SADC) are to achieve economic development, peace and security, and growth, alleviate poverty, enhance the standard and quality of life of the peoples of Southern Africa, and support the socially disadvantaged through Regional Integration. These objectives are to be achieved through increased Regional Integration, built on democratic principles, and equitable and sustainable development.

The objectives of SADC, as stated in Article 5 of the SADC Treaty (1992) are to:

- Achieve development and economic growth, alleviate poverty, enhance the standard and quality of life of the people of Southern Africa and support the socially disadvantaged through Regional Integration;
- Evolve common political values, systems and institutions;
- Promote and defend peace and security;
- Promote self-sustaining development on the basis of collective self-reliance, and the inter-dependence of Member States;
- Achieve complementarity between national and regional strategies and programmes;
- Promote and maximise productive employment and utilisation of resources of the region;
- Achieve sustainable utilisation of natural resources and effective protection of the environment;
- Strengthen and consolidate the long-standing historical, social and cultural affinities and links among the people of the Region.

SADC comprises 16 Member States1 with a population of approximately 327 million people and a combined GDP of USD 600 billion (2016).

---

1 The Southern African Development Community (SADC) is made up of Angola, Botswana, Comoros, Democratic Republic of the Congo, Eswatini, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Seychelles, South Africa, Tanzania, Zambia, Zimbabwe
The Secretariat has been implementing a new structure where there has been a creation of the Project Management Support Unit (PMS). The PMS is under the leadership of the Director Policy Planning and Resource Mobilization (D-PPRM). The PMS works with all Directorates and Units to provide technical project management support to all projects and programs during their Initiation, Planning, Execution (including Control) and Closing stages. Management of projects and programs is one of the key strategic priorities for the SADC Secretariat as highlighted in the Regional Indicative Strategic Development Plan (RISDP). Implementation of projects and programs is coordinated in a manner that contributes to the achievement of SADC strategic objectives. Projects are managed and implemented in different Directorates, Units, Member States or sites and implemented by different teams. In order to centralize all project related information, access it, and manage it, the Secretariat is going to procure consultancy services to develop and implement the online module for the SADC Project Management System (SPMS).

1.2. Contribution of Projects to the SADC Strategic Objectives

Projects and programs contribute to the achievement of both short term and long term strategic objectives of SADC. During project design and planning stages, project goals and objectives are aligned to the SADC Corporate Strategy, vision, mission and core values. The project quality review ensure that the project description of objectives, outcomes, outputs, and key activities are in line with SADC priorities. During the implementation stage, projects and programs achievements feed into the unit and directorate progress reports. Projects and programs within SADC will be managed with the end results in mind by adopting the Result Based Management Approach. Project Management Report formats will have a section to report annually on how the interventions are contributing to SADC strategic priorities. It is therefore important to have all project information collected, synthesized and incorporated into the SADC progress report. Projects are not stand alone; but are part and parcel of the SADC operations. Project staff need to be sensitized and oriented on this aspect in order that they understand why projects and projects are implemented within SADC.

1.3. The SADC Project Management System (SPMS)

The SADC Project Management System will help the Secretariat to achieve the following:

1. Align project and program interventions to SADC strategic priorities;
2. Ensure effective start, design, execution and closure of projects and programs;
3. Support projects and programs to identify and manage operational issues affecting them;

4. Put in place Project Performance Measures to track and report on their performance;

5. Provide ongoing capacity building on Project Management areas;

Currently the Secretariat is implementing many projects funded by different donors (such as EU, World Bank, GIZ, USAID, DFID, and others); all the donors have their own tools, reporting templates and project management requirements. The module will allow the Secretariat to put in place standardized project management approaches that will cut across all projects and programs.

**The online module of SADC Project Management System is funded by both Member State budget (under ICT) as well as under the TCF PE supported by EU.**

Automating the SPMS means managing the project management cycle processes, resources allocation, project meetings, communication, reporting and management of information related to projects and programs by using the online database (a Project Management Module that will be integrated into SIMS).

The online Module of Project Management System will streamline the management of project cycles from initiation to completion for the benefit of management, stakeholders, beneficiaries and staff. The online system is needed for the following benefits:

1. Easy access to summary project related information for action or decision making (name of projects within SADC, projects by Directorates, by funder, and others);
2. Better coordination of project processes and products (initiate, review, or approve project documents);
3. Quality project performance measures and reports are accessible by project managers/staff, support staff and management;
4. Project status known monthly and related remedial actions taken;
5. Project risks and issues affecting them displayed daily on the system for decision making;
6. Repository of most project related information (during reviews, audits, verifications, and post evaluations) even when projects close out their information remains with SADC;
7. Quality project documents as reviews will be done simultaneously or parallel through the system;
8. Stronger coordination and collaboration in dealing with project related matters (staffing, planning, reviewing, feedback).

12.2 If the Individual Consultant violates clause 12.1, then (s)he will automatically and legally be held to pay the amount estimated as the minimum reasonable damages resulting from a breach of confidentiality. This is without prejudice to the right of the Procuring Entity to demonstrate that a higher amount of loss has or may be incurred as a result of liabilities held by the Consultant in relation to the Procuring Entity.
