Telefax: (267) 3972848/3181070

As measured by the HCPI, the annual inflation rate for the SADC Region was 6.3% in October 2012 compared to October 2011. Monthly inflation in October 2012 was 0.2%, representing 0.8 percentage points decline from the rate observed in September 2012.

This news release is fifteenth in series and presents the Stage I HCPI figures for the SADC region for October 2012.

Compilation of the Stage I SADC HCPIs is based on the national HCPIs of fourteen SADC Member States¹. As also stated in previous HCPI news releases, the scope of the HCPIs at this stage does not include the Education and Health divisions of the Classification of Individual Consumption by Purpose (COICOP). However the HCPI development must generally be in compliance with the international standards relating to development of Consumer Price Indices (CPI). The excluded items will

be covered at a later stage. SADC Secretariat collaborating with Member States has already initiated measures for the migration to Stage 2 or full scale HCPI to be launched starting with HCPI January 2013.

The reported annual inflation rates for October 2012 for Member States ranged from a highest of 25.3% for Malawi, and a lowest of 1.7% for Mozambique. The rates for the rest of the Member States were reported as follows: Botswana (7.5%), DRC (4.5%), Lesotho (5.5%), Madagascar (7.3%), Mauritius (4.7%), Namibia (6.6%), Seychelles (7.2%), South Africa (5.3%), Swaziland (10.2%), Tanzania (12.8%), Zambia (4.3%)

and Zimbabwe (4.5%), as reflected in table 1 below.

In terms of COICOP major divisions, all divisions registered increases in their indices in October 2012 compared to October 2011 as follows: Alcoholic Beverages and Tobacco (8.8%), Housing, Electricity, Water, Gas and Other Fuels (7.7%), Transport (7.6%), Restaurants and Hotels (5.9%), Food and Non Alcoholic Beverages (5.2%), Clothing and Footwear (5.1%), Recreation and Culture (4.2%), Furnishings, Household Equipment and Routine Maintenance of House (4.1%), Miscellaneous Goods and Services (2.6%) and Communication (2.0%). See table 2 below for more details.

	Annual average HCPI - 2012			

Measures of inflation

The annual rate measures the price change between the current month and the corresponding month of the previous year. The rate is responsive to recent changes in price levels but it can

also be influenced by one-off effects in either month.

The 12 month average compares the average HCPI in the latest 12 months to the average of the previous 12 months. It overcomes

the volatility of the annual measure. The monthly rate measures the price change between the two latest months. Although up to date, it can be affected by seasonal and other short-term effects

The Harmonised Consumer Price Index

The Harmonised Consumer Price Index (HCPI) is defined as the Consumer Price Index (CPI) developed from comparable methodologies. That means CPIs which have been developed from the concepts, definitions and methods that are comparable. CPIs are economic indicators that measure changes overtime of prices of consumer goods and services purchased by households. HCPI is meant to provide an official measure of inflation in the region, and it makes international comparisons easier since the national HCPIs are produced using harmonised methodologies and as much as practicable using the same statistical classifications, standards and frameworks.

Both the HCPIs and national CPIs measure inflation faced by

consumers, and use the same data sources in most part. However, the two measure inflation with different aims and therefore, sometimes may use different concepts and methods. HCPI's main use is for monetary policy, and is used as one of the convergence criteria to assess compliance of Member States to economic unions and to monitor progress towards integration. Member states of economic unions are given target inflation levels to achieve, in specified period to be considered for some preferential treatments within the integration. And this requires a harmonised conceptual framework and comparable results. The national CPIs in addition to being the measure of inflation have many other purposes such as cost of living which may require different methodologies.

The Member States HCPIs are produced by respective Member States using agreed harmonised methodologies. The SADC HCPI is compiled by the SADC Secretariat by aggregating the National HCPIs of the Member States. These are calculated as weighted averages of the national HCPIs, using as weights each country's total household consumption expenditure converted to a common currency using the 2005 purchasing power parities derived from the results of the 2005 International Comparison Program as supplied by the African Development Bank and the World Bank.

More information on SADC HCPI methodology can be availed on demand.

Acknowledgement

The SADC Secretariat duly acknowledges with thanks the continuous support and cooperation of the respective

National Statistics Offices of SADC Member States in providing monthly national HCPIs which forms the basis for the aggregate

SADC HPCI. The collaboration with COMESA and African Development Bank in this exercise is equally acknowledged.

Production team

This news release was produced under the auspices of the SADC Statistics Programme in the Directorate of Policy Planning Resource Mobilisation of the SADC Secretariat, Gaborone,

Botswana. The production team comprised **Mr. Ackim Jere** (Head SADC Statistics Programme) and **Ms. Mantoa Molengoane**. The news release was produced under the general direction of **Dr.**

Angelo Mondlane, Director - Directorate Policy Planning Resource Mobilisation.

Further information pertaining to methodology and related aspects of the HCPI process in SADC can be obtained by directing inquires to the following two individuals whose contact details are presented below.

Mr. Ackim Jere
Senior Officer - Statistics
Directorate-Policy, Planning Resource Mobilisation
SADC Secretariat
Private Bag 0095
